EMERGENCY: Synapse Chronicles STEAM PAGE TAKEN DOWN by Convicted CRIMINAL JOZEF VICTOR NATHAN GHERMAN.

Jozef Gherman, a CFTC-sanctioned CRYPTO scammer, and AI scammer, LIED about a Florida court order from a separate case to FALSELY DMCA STRIKE the STEAM PAGE and PATREON PAGE of an INDIE GAME he does NOT own.

Gherman does NOT own Synapse Chronicles. He has no copyright, no assignment, no paperwork, NOTHING. We are fighting him for another unrelated INDIE GAME in court right now. This is DMCA lawfare against INDIE developers.

Our legal team is working with Steam and Patreon right now to restore the game.

The DMCA process should NOT be used as a bad-faith harassment tool to suppress an independently developed game.

The FALSE DMCA notice claims that SYNAPSE CHRONICLES is using “stolen assets and code” from SSRWives, an unrelated different indie game. Gherman/XYZ AI claims to be the owner of SSRWives, (which is under dispute in court right now.)

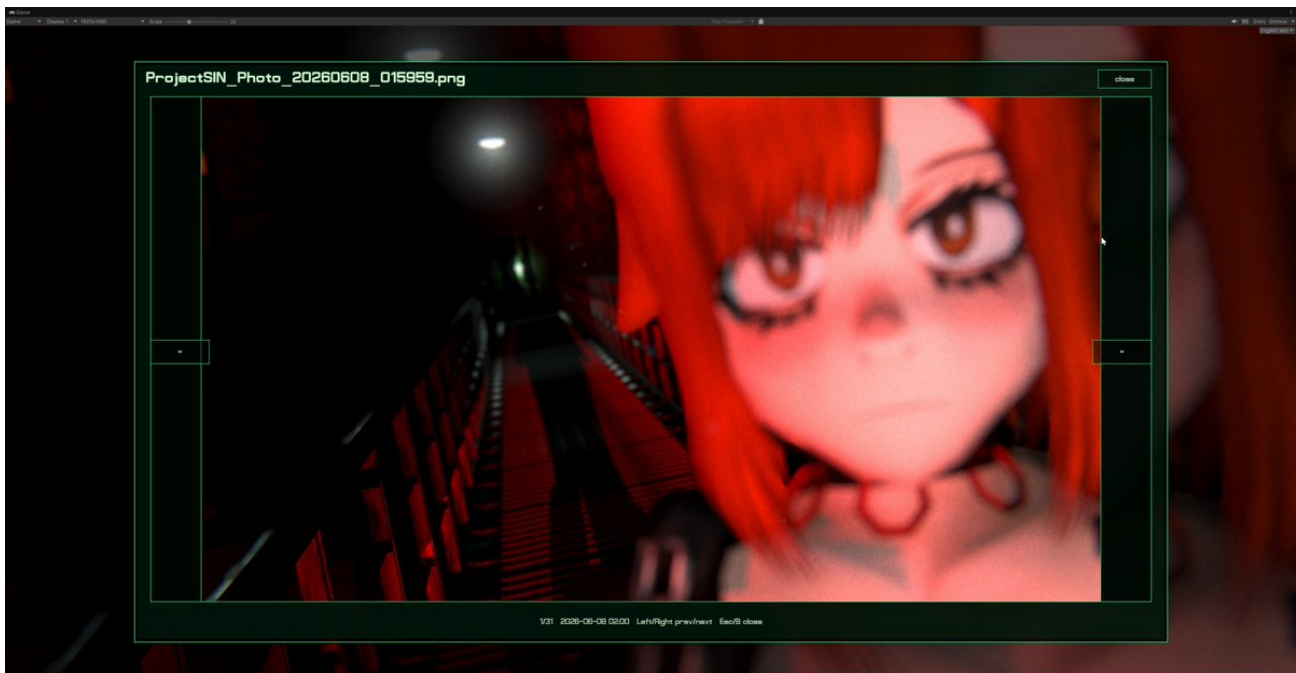

Synapse Chronicles is not derived from SSRWives. It does not share source code, assets, characters, narrative elements, gameplay systems, or gameplay genre with SSRWives.

NOWHERE IN ANY COURT DOCUMENT OR ORDER DOES IT CLAIM THAT SYNAPSE CHRONICLES IS USING STOLEN CODE OR ASSETS FROM SSRWIVES.

Synapse Chronicles is a third-person action/adventure game. SSRWives is a fixed-camera, tank controls, survival horror game. Synapse Chronicles is a hi-fidelity rendering game, SSRWives is an intentionally low-fidelity PSX-style rendering game.

Synapse Chronicles is fully owned by CorpusWorks LLC, my new indie game company. All IP and Assets are assigned to the new company, and fully certified as such. We have a Copyright pending with the USCO.

GHERMAN IS LYING TO STEAM.

Background Information:

Gherman defrauded his co-founder, our co-developer, Simon Dickerman out of his 50% ownership in their company XYZ AI Inc. Simon is the reason I signed on to work with XYZ AI Inc, and is himself an impassioned talented Developer who is writing the rendering features for Synapse Chronicles.

When SSRWives was transferred to XYZ AI, it was represented to me and everyone that Simon and Gherman are 50/50 cofounders. Simon wrote all the code for the core company products and was involved in every administrative decision.

Gherman and Simon's 50/50 ownership was always acted upon, and it was put to writing in October of 2025 via what Gherman called the "Founder Split Agreement".

Gherman clearly laid out Simon's ownership in the company, payment, and right to SSRWives IP over message attached below. Simon executed this formal agreement by sharing access to all digital infrastructure for XYZ with Gherman after Gherman sent the agreement to his lawyer to be formalized.

Days later, Gherman used that new account access to lock Simon and the rest of us out of everything, and sent a "Separation" notice demanding Simon waive his ownership in the company and the INDIE game and the founder split agreement in exchange for \$250,000.

Simon refused, and the lawsuit between us and Gherman began.

Founder split agreement keypoints:

1. StealthGPT and Eryn are to be transferred to entities under the XYZ AI umbrella
2. Simon Dickerman is to be issued 49% of StealthGPT equity, and 5% of Eryn equity, the remainder will fall to XYZ AI Inc
3. Simon Dickerman will have an agreement of 'shadow equity/ phantom stock' that is equal to 50% in the event of sale/aquisition
4. Simon and Jozef agree on an action plan to make a determination of sale or "cash flowing the business", this agreement will cover a 6 month term at which point a decision will be made to move towards a sale or to cash flow the business based on a set of objectives.
5. XYZ AI Inc will disburse to Studio Hen LLC 5 months of salary provisions for their team in the amount of \$250,000 this includes a 5 month guarantee for Simon Dickerman of \$30,000 a month which is included in the lump sum amount but may be distributed through normal xyz ai inc payroll.

This list isn't complete for all the things we agreed on, this is a list of legal objectives that we need the lawyer to do

edited the message lol but things like the relationship between you and i, we don't need an agreement for.

The list is what we need the lawyer to do and draft up. Let me know if I'm forgetting any other legal stuff

5:50 PM

We should also draw up a personal agreement for ourselves where we can include these terms but also the terms of employment, etc. that we don't need the lawyer for.

Let me know if everything is square to send of to the lawyer. We should talk about the 5 month term. I put a 'set of objectives' we need to handle that. Do you want to get together, we can hammer that out and you can do the transfer of assets?

Since the founder lockout and financial theft in October, Gherman has been on a pathetic rampage against Simon and I, and our friends and co-devs.

The evidence is clear as day that Gherman and Simon are co-founders of their company XYZ AI, worth millions. Gherman himself claimed that the IP to SSRWives is in fact Simon's, who was in the process of transferring it to me before the Founder Lockout in October.

Gherman's history of criminal activity is well documented. CFTC sanctioned him for fraud involving dozens of Crypto currency investors in 2021.

Gherman was Nick Fuentes' right-hand man and chief of staff at the time, often called "Assistant Groyper".

Gherman led many crypto schemes after his CFTC order that banned him from Crypto, including MINTMONEYNFT, one of the first NFT projects to be named by the Texas State Securities Board in a ruling against NFT fraud.

Hey @everyone

we are looking at 12.5k right now in revenue so everyone should be making at least 2k right around

basically what I need to do is use 20% to sweep milady floor (2 nfts rn), i need to estimate how much we will need for merch, and i need to do an estimate for nftx liquidity and then we can divy up the rest.

i would say probably half of the mint is spoken for

hey guys so we are favoring a pivot with the Milady Rave to a free mint and using it as a way to buy clout. We will make twitter alts and use them as main twitter accounts putting @bearmkt survivor (milady simp) at the center of it, we will form a twitter group to build up a base of power and we will commit a few months to this opp of building a base, building clout and building an audience for a much bigger release down the line @everyone

- 43. Respondents are promising to provide other benefits to owners of the Gambler NFTs and Golden Gambler NFTs.
- 44. For example, the Gambler NFTs provide free entry to weekly tournaments and premium rates for advertising and linking portals to the metaverse casinos.
- 45. The Gambler NFTs also provide owners with guaranteed entry in a monthly lottery. Respondents are describing their implementation of the monthly lottery as follows:
 - A. Respondents are promising to airdrop lottery tickets to owners of Gambler NFTs, providing one ticket per NFT per month.
 - B. In addition to receiving lottery tickets via airdrop, owners of Gambler NFTs can purchase additional lottery tickets - or even sell their lottery tickets - through OpenSea.
 - C. Respondents are representing they partnered with MintMoneyNFT.io aka MintMoneyNFT aka MintMoney.eth aka MintMoney to administer the lottery.
 - D. MintMoneyNFT.io permits minting randomly generated NFTs that are lottery tickets and permits owners to participate in MATIC. MATIC is similar to Tick-Tack-Toe but displays a three-by-three grid containing a total of nine gems. Players engage with MATIC by aligning similar gems in vertical, horizontal or diagonal rows.
 - E. The lottery prizes are lucrative and include monetary awards up to \$250,000 and other prizes including iPhones, MacBooks, and automobiles.
 - F. Although Respondents are promising to reward winners with lucrative prizes, they also expect to generate revenue through the lotteries. They are representing they will transfer most of the revenue to the "prizes pool." Respondents will use the additional revenue to fund prizes pool to award even more lucrative prizes in future lotteries.

- 46. Additionally, on March 29, 2022, Respondents reportedly airdropped 777 voxel assets representing voxel characters to owners of Gambler NFTs. Voxel assets are assets consisting of 3D pixels that exist as cubes instead of squares, and they can be equipped by avatars and bought and sold in metaverse marketplaces. Voxel assets are airdropped when they are freely distributed from one party to another party on a blockchain platform.
- 47. The voxel assets, as well as other custom voxel assets available for purchase, provide rakeback and other benefits in the metaverse casinos.

CFTC Orders Florida Man and His Company to Pay Over \$397,000 in Connection with a Digital Assets Solicitation Scheme

April 20, 2021

Washington, D.C. — The Commodity Futures Trading Commission announced today that it has issued an order filing and settling charges against **Jozef Gherman** of Florida and **J Squared LLC**, a Florida limited liability company, for making misleading statements or omitting material facts in connection with soliciting more than \$300,000 from over 40 individuals to invest in digital assets. Gherman was an employee and one of the founders of J Squared and was its principal owner and CEO.

The order requires Gherman and J Squared to pay a \$150,000 civil monetary penalty, with the amount to be paid by each capped at \$75,000, and any post-judgment interest. The order also requires Gherman and J Squared to pay \$247,110 in restitution, with the amount to be paid by each capped at \$123,555, and any post-judgment interest. In addition, the order imposes a 10-year ban on Gherman and J Squared from trading on or subject to the rules of any CFTC-registered entity, and from engaging in any activities requiring registration with the CFTC.

Us and our lawyers have been actively working with the CFTC and other law enforcement agencies to bring justice against Gherman's fraud.

Gherman will not be able to get away with FRAUD against INDEPENDENT developers, business partners, or GAMERS.

Synapse Chronicles will be restored to STEAM and PATREON soon, and will be RELEASED by the end of 2026. This will not slow down our development, and we will not let this CRIMINAL stand in the way of GAMERS who want to play our new game.

More gameplay features and updates will be coming soon, and a full vertical slice DEMO will release on STEAM this Summer.
